LE6940™

ADVANCED LAW ENFORCEMENT CARBINE
COMPACT - LIGHT WEIGHT - 5.56 MM POWER

The Colt LE6940 Advanced Law Enforcement Carbine is the Tactical Operators answer to demanding situations. The advantage is unmatched. Built to Mil-Spec standards, no other company combines the quality and craftsmanship that Colt Defense LLC does. The LE6940 demonstrates fresh ingenuity with Mil-Spec hammer and trigger pivot pins, Mil-Spec backup iron sight and folding front sight for enhanced optical solutions, straight gas tube, and removable lower rail providing modularity for under mounting accessories.

The patented* one-piece monolithic upper receiver incorporates a continuous Mil-Spec rail from the rear of the upper receiver to the front sight. This feature provides unmatched repeatability for mounting of optical systems, not found with separate handguard rail systems. Designed with accuracy in mind it provides a true free floating barrel, the enhanced accuracy provides longer-range acquisition capability.

Other features incorporated by the patented* one-piece monolithic upper receiver are:

- Mil-Spec rails in the 3 and 9 o'clock positions
- Quick detachable swivel mounting points- eliminating the use of mounts on the barrel
- Removable Lower Rail- provides a Mil-Spec rail in the 6 o'clock position

The LE6940 eliminates doubt in the hands of the Operator –
Leaving you one step ahead of your opponent.

Maximize your potential. Get a legend that has served our Law Enforcement and U.S. Military personnel for over 170 years.
